

Use the Carmakers dataset and analyze the following

- Create a Side-by-Side Bar chart using the fuel type Dimension
- Show the Average Milage in terms of City and Highway

- List out three drawbacks of using the Side-by-Side bar chart.

- 1) The side-by-side bar chart has limitation to number of sidebars.
- 2) It is difficult to read with many columns.
- 3) More bars will be complex and hard to explore any useful information.
